Election/Restrictions

1. Applicant's election with traverse of Invention I, claims 1-36 in the reply filed on 9/21/05 is acknowledged. However, upon reconsideration the Examiner has concluded that there should have been a restriction done in addition to the prior restriction. The Examiner apologized for any inconvenience brought upon the Applicants. An additional restriction is necessitated due to the recognized divergent subject matter.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) Within each of the ventilated and rack system, there is lack of unity between the following patentably distinct species, please elect from one of these distinct Species:

Species 1: a ventilated and rack system as shown in Figures 1-3.

Species 2: a ventilated and rack system as shown in Figures 6-10, and 16.

(2) Within each of the cage top, there is lack of unity between the following patentably distinct species, please elect from one of these distinct Species:

Species A: a cage top as shown in Figure 5.

Species B: a cage top as shown in Figures 11, 12A-12B, 13A-13C, 14A-14B, and 15A-15C.

(3) Within each of the diet delivery module, there is lack of unity between the following patentably distinct species, please elect from one of these distinct Species:

Species11: a diet delivery module as shown in Figures 17-19.

Species 22: a diet delivery module as shown in Figures 20-24.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
